“Die Bobby Die” LP/CD

Their astonishing sixth album. 'DIE BOBBY DIE' is a sparkling collection of wicked hits. Thirteen songs that will take you high and will calm you down. Pharmaceutical-grade sounds, amphetamine-fueled fever dreams (nightmares?!). The bass is now played by Rob Del Bueno, the eccentric scientist who lead the sci-fi instrumental band MAN OR ASTROMAN? to world-wide acclaim. And of course, as always since day one, Clay Reeds epileptic guitar spurts and vocals snarl, and the coolest woman in rock&roll since (The Cramps) Poison Ivy, Buffi Aguero and her lo-fi primitive drum beat pounds.
